PROFESSIONAL PROFILE

I am an Information Technology student at King Abdulaziz University with strong hands-on experience in **cybersecurity, network design, and system security**. Experienced in building secure network infrastructures, developing security-focused applications, and participating in cybersecurity initiatives and competitions. Skilled in **networking, encryption, and security analysis**, with a strong interest in protecting systems and infrastructure in enterprise environments.

TECHNICAL PROJECTS

Hotel Network Design — Cisco Packet Tracer
• Designed and implemented a multi-floor hotel network using VLAN segmentation, inter-VLAN routing (Router-on-a-Stick), DHCP, and OSPF dynamic routing to enable secure communication between departments.
• Configured SSH remote access, wireless connectivity, and switch port security to improve network scalability, performance, and security.

HR Leave Management System
• Developed a desktop HR management system to manage employee records, leave requests, contracts, and reports in a centralized platform.
• Applied Object-Oriented Programming and Java GUI design along with system analysis and UML modeling to create an efficient HR workflow.

Java Log Analyzer Tool
• Built a GUI-based log analysis tool that detects failed login attempts, error messages, and suspicious repeated IP addresses from log files.
• Implemented file processing, regular expressions, and HashMap structures to analyze logs and identify potential security **incidents.**

AES Encryption Application
• Implemented AES encryption and decryption using ECB and CBC modes to demonstrate practical symmetric encryption concepts.
• Developed a Java Swing interface that converts encrypted blocks into Base64 for clear visualization of encryption results.

EDUCATION

King Abdulaziz University | Saudi Arabia
Bachelor's Degree of Information Technology | GPA: 4.86/5.00 | August 2022 – June 2027

SKILLS

Programming: Java, Python

Networking: IP Addressing, DNS, Routing, VLANs, OSPF

Cybersecurity: Network Security, Threat Analysis, Log Analysis, Security Fundamentals

Tools: Cisco Packet Tracer, GitHub, Linux CLI, Virtual Machines

Soft Skills: Critical Thinking, Problem Solving, Communication Skills, Teamwork, Time Management, Adaptability, Attention to Detail, Analytical Thinking

CERTIFICATIONS

- Cybersecurity Summer Bootcamp | **National Cybersecurity Authority (NCA) & SITE** | Jul 2024
- Security Operations | **ISC2** | Jan 2024
- Security Principles | **ISC2** | Jan 2024
- Access Control Concepts | **ISC2** | Aug 2024
- Cybersecurity Architecture | **IBM** | Jan 2024
- Cybersecurity Assessment (CompTIA Security+ & CySA+) | **IBM** | Jan 2024
- Introduction to Cybersecurity Tools & Cyberattacks | **IBM** | Jan 2024
- The Bits and Bytes of Computer Networking | **Google** | Sep 2025
- Technical Support Fundamentals | **Google** | Sep 2024

VOLUNTEERING

Head of Media & Marketing – IEEE KAU Student Branch
- Led the media and marketing team for technical events
- Managed promotional campaigns and digital content

Vice Leader – Cybersecurity Club (KAU)
- Wrote cybersecurity educational content
- Contributed to awareness and technical publications
